# Cerebral Palsy Bulletin

# Volume 1

## Numbers 1—8: 1958–1959

# INDEX

**Bold Figures** *refer to issue numbers. They are followed by the page number of the issue concerned*

ABERCOMBIE, M. L. J.: On discussing terminology and classification, **5,** 24
Abnormalities, mental and cardiac, relation to familial spastic paraplegia (*abstr.*), **3,** 26
AGASSIZ, C. D. S.: Habilitation of adult 'spastics', **7,** 42
Agnosia, visual-spatial (*abstr.*), **3,** 28
AICARDI, J. *See* THIEFFRY, S., **4,** 28
ALBITRECCIA, S. I.: Recognition and treatment of disturbances of the body image, **4,** 12
ANDRÉ-THOMAS: Integration in the infant, **8,** 3
Aphasia in children, **7,** 20
Arnold-Chiari malformation (*abstr.*), **4,** 29
Asphyxia neonatorum, influence on mental and physical condition of the child, **1,** 5
Ataxia, cerebellar, drug therapy (*abstr.*), **8,** 44
Ataxia-telangiectasia (*abstr.*), **4,** 28

BAIRD III, W. H. *See* SPIEGEL, E. A., **5,** 61
BALLOWITZ, L., and FLEISCHAUER, G.: Late cerebral sequelae of icterus gravis neonatorum (*abstr.*), **3,** 29
BAMPING, F.: Movement of films between countries, **6,** 19
BARGER, W. C.: Late reading in children, **7,** 20
BATES, J. A. V.: Results of cerebral surgery for motor disorders, **6,** 29
Behaviour characteristics in children (*abstr.*), **4,** 31
BERNHEIM, M., and LARBRE, F.: Diagnosis of cerebral phlebitis in children. Value of extra-cranial venous signs (*abstr.*), **3,** 31
Biography: André-Thomas, **8,** 1
— Hector Charles Cameron, **2,** 5
— William John Little, **1,** 3
BISHOP, W. J.: William John Little, 1810–94, a brief biography, **1,** 3
Blood, oxygen saturation in newborn following obstetrical complications (*abstr.*), **3,** 26
— — — in premature infants (*abstr.*), **3,** 29
BOBATH, B. *See* BOBATH, K., **3,** 29
BOBATH, K.: Neuropathology of cerebral palsy and its importance in treatment and diagnosis, **8,** 13
— and BOBATH, B.: Control of motor function in the treatment of cerebral palsy (*abstr.*), **3,** 29
BODER, E., and SEDGWICK, R. P.: Ataxia-telangiectasia. A familial syndrome of progressive cerebellar ataxia, oculocutaneous telangiectasia and frequent pulmonary infection (*abstr.*), **4,** 28
Body image, **4,** 4
— — development, **4,** 9
— — disturbance of, **4,** 7
— — — recognition and treatment, **4,** 12

BOOK REVIEWS

BOWLEY, A. H.: *The Young Handicapped Child: Educational Guidance for the Young Blind, Cerebral Palsied and Deaf Child*, **2,** 35
BRODAL, A.: *The Cranial Nerves*, **8,** 38
CARDWELL, V. E.: *Cerebral Palsy: Advance in Understanding and Care*, **2,** 35
CHAMBERLAIN, V. C.: *Adolescence to Maturity*, **7,** 51
CLARKE, A. M., and CLARKE, A. D. B.: *Mental Deficiency: the Changing Outlook*, **5,** 58
COLLIS, E., COLLIS, W. R. F., DUNHAM, W., HILLIARD, L. T., and LAWSON, D.: *The Infantile Cerebral Palsies*, **2,** 33
DUNSDON, M. I.: *The Educability of Cerebral Palsied Children*, **2,** 32
FLOYER, E. B.: *A Psychological Study of a City's Cerebral Palsied Children*, **2,** 34
GAIRDNER, D. (Editor): *Recent Advances in Paediatrics*, 2nd ed., **8,** 37
ILLINGWORTH, R. S. (Editor): *Recent Advances in Cerebral Palsy*, **4,** 20
KOUPERNIK, C.: *L'Eqilibre Mental*, **6,** 37

LEFF, S., and LEFF, V.: *The School Health Service*, **7**, 49
MAUTNER, H.: *Mental Retardation: its Care, Treatment and Physiological Base*, **7**, 52
MICHAL-SMITH, H.: *Management of the Handicapped Child: Diagnosis, Treatment and Rehabilitation*, **2**, 35
POYNTER, F. N. L. (Editor): *The History and Philosophy of Knowledge of the Brain and its Functions*, **8**, 37
RUSS, J. D., and SOBOLOFF, H. R.: *Primer of Cerebral Palsy*, **3**, 20
SALMON, F. C., and SALMON, C.: *Rehabilitation Center Planning: an Architectural Guide*, **7**, 18
SCHONELL, E. E.: *Educating Spastic Children*, **2**, 36
STREAN, L. P.: *The Birth of Normal Babies*, **8**, 38
U.N.A.R.: *Sauvegarde de L'Enfance. Nos.* 1–4, **4**, 25
WILLIS, R. A.: *The Borderland of Embryology and Pathology*, **8**, 36
WOODS, G. E.: *Cerebral Palsy in Childhood*, **3**, 18

BOWER, B. D., and JEAVONS, P. M.: Infantile spasms and hypsarrhythmia (*abstr.*), **7**, 56
Brain, basal ganglia, disorders, drug therapy (*abstr.*), **8**, 44
— cells, susceptibility to damage, **4**, 18
— cortex, laminar necrosis, aetiology and pathogenesis (*abstr.*), **3**, 24
— — lesions in cerebral palsy, **6**, 22
— damage, late, from icterus gravis neonatorum (*abstr.*), **3**, 29
— — lesser, learning disabilities associated with (*abstr.*), **5**, 61
— development, abnormal, effect on function, **7**, 27
— gliosis, infantile, with giant nerve cells (*abstr.*), **3**, 26
— lesions in newborn infants (*abstr.*), **7**, 55
— motor disorders, electromyography in measurement of spasticity (*abstr.*), **6**, 38
— phlebitis in children, diagnosis (*abstr.*), **3**, 31
— protein metabolism (*abstr.*), **8**, 42
— surgery, in motor disorders, **6**, 29
— temporal lobe lesions complicating infantile cerebral palsy (*abstr.*), **7**, 55
BRANDT, S.: Some remarks on terminology and classification, **5**, 43
— and WESTERGAARD-NIELSEN, V.: Aetiological factors in cerebral palsy and their correlation with various clinical entities (*abstr.*), **3**, 23
BRIGGS, J. N. *See* MITCHELL, J. R., **8**, 41
BULIN, G. V. *See* GENTRY, J. T., **8**, 42
BURNETT, L. L., GIBBS, E. L., and GIBBS, F. A.: Prognosis in infantile spasms (*abstr.*), **3**, 25
BURTON-BRADLEY, C.: Clinical features of children suffering from neurological sequelae of Rh isosensitization (*abstr.*), **3**, 32

CALMA, I.: Reticular formation revisited, **6**, 1
CAMERON, H. C.: Spasticity and the intellect, **2**, 1
CAPES, M.: Oxford Study Group on child neurology and cerebral palsy, **4**, 1
CAVANAGH, J. B.: Lesions of the temporal lobes complicating infantile cerebral palsy (*abstr.*), **7**, 55
Cerebral palsy, advice service for children (*abstr.*), **3**, 24
— — aetiological factors, correlation with various clinical entities (*abstr.*), **3**, 23
— — child neurology and, **4**, 1
Cerebral palsy choreo-athetoid, natural clinical history (*abstr.*), **7**, 53
— — classification of, **5**, 23, 24, 27, 36, 39, 43, 53
— — clinical study (*abstr.*), **5**, 62
— — cortical lesions in, **6**, 22
— — definition and classification, **2**, 21
— — diagnosis, early, **2**, 6; **8**, 27
— — electroencephalography in, **3**, 16
— — electromyography in (*abstr.*), **6**, 38
— — film facilities in cerebral palsy centres, **2**, 28
— — habilitation of adult 'spastics', **7**, 42
— — hip dislocation in (*abstr.*), **3**, 31
— — hypertonus in, classification, **7**, 14
— — infantile, temporal lobe lesions complicating (*abstr.*), **7**, 55
— — medical aspects of Eastern Scotland survey, **7**, 32
— — motor handicap in, causes, **8**, 17
— — — function in, quantitative assessment in evaluation of zoxazolamine treatment (*abstr.*), **3**, 30
— — neurological terms in, **5**, 47
— — neuropathology, importance in diagnosis and treatment, **8**, 13
— — orthopaedic surgery in (*abstr.*), **3**, 23
— — polymyographic studies of voluntary and involuntary movements, **7**, 10
— — prematurity associated with (*abstr.*), **5**, 59
— — problem of, **8**, 13
— — prognosis (*abstr.*), **3**, 24
— — survival rates in (*abstr.*), **7**, 54
— — teaching-training principles in (*abstr.*), **3**, 32
— — terminology, **5**, 24, 27, 40, 43, 51, 53
— — treatment, control of motor function in (*abstr.*), **3**, 29
— — — zoxazolamine in children (*abstr.*), **3**, 30
— — value of films in cerebral palsy centres, **2**, 26
*Cerebral Palsy News*, **8**, 33
Children, anoxic convulsions in, clinical and electroencephalographic study (*abstr.*), **5**, 59
— behaviour characteristics of (*abstr.*), **4**, 31
— cerebral palsied, advice service (*abstr.*), **3**, 24
— — — cost of care (*abstr.*), **3**, 28
— — — development of motor control for walking (*abstr.*), **6**, 39
— — — educational disabilities, **5**, 16
— — — intelligence levels (*abstr.*), **4**, 29
— — — learning ability, influence of meprobamate on (*abstr.*), **5**, 60
— — — parents of, problems and needs, **3**, 6
— — — sensory disturbances of hands (*abstr.*), **3**, 24
— — — special learning difficulties, **2**, 9
— — — zoxazolamine treatment (*abstr.*), **3**, 30
— — phlebitis in, diagnosis (*abstr.*), **3**, 31
— deformities in, influence of abnormal parturition, **1**, 5
— development, dissociation as guide to assessment (*abstr.*), **4**, 29
— handicapped, late reading in, **7**, 20
— height and weight charts, **4**, 26
— malformations, congenital, relation to natural radioactivity (*abstr.*), **8**, 42
— neurological development and cerebral palsy, **4**, 1
— — sequelae of icterus gravis neonatorum in (*abstr.*), **3**, 32
— physically handicapped, survey in schools for (*abstr.*), **6**, 40
— spasticity in, characteristics, **5**, 5

medical
3-13-64
Replace.

Chlorpromazine, in mental deficiency (*abstr.*), **4,** 29
CHURCHILL, J. A.: Relationship of Little's disease to prematurity (*abstr.*), **4,** 27
CLAIREAUX, A. E.: Cerebral pathology in the newborn (*abstr.*), **7,** 55
CLARKE, A.: Teaching imbeciles industrial skills, **6,** 14
'Clasp-knife' phenomenon, **6,** 32
Conferences: National Spastics Society and the Medical Committee of the Scientific Film Association, **2,** 26
Convulsions, anoxic, in children, clinical and electroencephalographic study (*abstr.*), **5,** 59
COURVILLE, C. B.: Aetiology and pathogenesis of laminar cortical necrosis: its significance in evaluation of uniform cortical atrophies of early life (*abstr.*), **3,** 24
CRAFT, M.: Tranquillizers in mental deficiency (*abstr.*), **4,** 29
— Tranquillizers, a Latin Square trial (*abstr.*), **8,** 45
CRAIG, W. S.: Clinical signs of neonatal tetany: with especial reference to their occurrence in newborn babies of diabetic mothers (*abstr.*), **4,** 31
CROME, L.: Infantile cerebral gliosis with giant nerve cells (*abstr.*), **3,** 26
— Cortical lesions in cerebral palsy, **6,** 22
CROSLAND, J. H.: Hypertonus and physical therapy, **6,** 34
Czechoslovakia, District Children's Hospital, Brno, Neurological Department, **8,** 34

DALLOZ, J. C. *See* TARDIEU, G., **7,** 14
DANIEL, P. M., and STRICH, S. J.: Some observations on the congenital deformity of the central nervous system known as the Arnold-Chiari malformation (*abstr.*), **4,** 29
DANN, B., LEVINE, S. Z., and NEW, E. V.: Development of prematurely born children with birth weights or minimal postnatal weights of 1,000 grams or less (*abstr.*), **6,** 40
Deafness, word, change of acoustic function in (*abstr.*), **3,** 28
Dementia, key stimulation for spatial turning movements (*abstr.*), **3,** 26
DEPAPE, A. J. *See* MITCHELL, J. R., **8,** 41
Diabetes mellitus, maternal, clinical signs of neonatal tetany with (*abstr.*), **4,** 31
DOMANOWSKY, K. *See* WIESER, S., **7,** 54
Dynamometer recording of motor function, **7,** 12
— — of stretch reflex, **7,** 14

Education, disabilities of cerebral palsied children attending Local Education Authority schools, **5,** 16
EDWARDS, J. H.: Congenital malformations of the central nervous system in Scotland (*abstr.*), **4,** 30
ELAM, H. *See* TURNER, M., **6,** 38
Electroencephalogram in anoxic convulsions in children (*abstr.*), **5,** 59
Electroencephalography in cerebral palsy, **3,** 16
Electromyography in cerebral palsy (*abstr.*), **6,** 38
— in measurement of spasticity in cerebral motor disorders (*abstr.*), **6,** 38
— in stretch reflex, **7,** 14
Electropallidoansotomy in extrapyramidal and convulsive disorders (*abstr.*), **5,** 61
Encephalopathy, infantile subacute necrotizing, with predilection for the brain stem (*abstr.*), **3,** 27
ENGEL, C. E.: Relative value of kinetic and static records of the analysis of movements, **2,** 29
Epilepsy, differentiation from anoxic convulsions (*abstr.*), **5,** 59
Erythroblastosis foetalis. *See* Icterus gravis neonatorum
ETTLINGER, G., WARRINGTON, E., and ZANGWELL, O. L.: Further study of visual-spatial agnosia (*abstr.*), **3,** 28

Films, difficulties and successes in the use of, **2,** 27
— facilities in cerebral palsy centres, **2,** 28
— meeting the needs of clinicians and therapists, **2,** 30
— movement between countries, **6,** 19
— relative value of kinetic and static records of the analysis of movements, **2,** 29
— value of, in cerebral palsy centres, **2,** 26
FLEISCHHAUER, G. *See* BALLOWITZ, L., **3,** 29
'Flexin'. *See* Zoxazolamine
Fluorine, pathogenic role in mongolism (*abstr.*), **8,** 43
Foetus in maternal rubella, pathological study (*abstr.*), **3,** 31
FORSYTH, H. F.: Methocarbamol (robaxin) in orthopaedic conditions (*abstr.*), **4,** 27
FREEDHEIM, D. K. *See* HOHMAN, L. B., **4,** 29

GAAG, C. J. VAN DER: Neurological Department of the District Children's Hospital in Brno, **8,** 34
Ganglia, basal, disorders, drug therapy (*abstr.*), **8,** 44
